## **PRESS RELEASE**

### **Connexion Technologies Boasts Record Month**

*Signs a total of nine contracts in March*

Cary, North Carolina (April 18, 2007) – Connexion Technologies will build its state-of-the-art fiber networks in three more properties along the east coast...bringing the total to nine in March. The three newly-acquired developments are: St. Tropez, three high-rise condominiums overlooking the Atlantic in Sunny Isles, FL (J. Milton and Associates); Somerby at Alpharetta, a senior residential community outside of Atlanta, GA (Dominion Partners); and Headwaters at Banner Elk, a multi-family community in the mountains of North Carolina (Headwaters Development).

“Developers are starting to understand the benefits of partnering with us,” said Glen Lang, CEO of Connexion Technologies. “The beauty is that we can bring our technological amenity to a variety of property types.”

In the years since Connexion Technologies, the country’s premier fiber-optic amenity company, began partnering with developers, it has brought fiber-optic technology to single-family, multi-family, resort and high-rise properties alike. Because Connexion not only customizes its efforts to design, build and install the networks for developers but also funds the projects with its own capital, partnerships continue to grow.

“We cater to the needs of each developer. We don’t just use a generic plan to install these networks,” Lang said. “Our operations, design and engineering divisions work hard to make sure Connexion Technologies, and the fiber-optic amenity, is a perfect fit for our developers.”

The partnerships in March translate into over 4,000 additional units for Connexion to “light” with fiber-optics. That growth rate is one of many reasons that Connexion continues to lead the industry in fiber-optic deployment.

#### **About Connexion Technologies**

Connexion Technologies, the country’s premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Its award-winning, blazing fast, Fiber to the Home (FTTH) and Fiber to the Unit/Premise (FTTU/P) networks have virtually unlimited bandwidth and are “future-ready” to handle emerging technologies. Connexion aligns its networks with leading service providers, who supply the best in television, voice, Internet, and security monitoring services. Connexion also offers properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), in-room and in-unit monitoring and management to remote energy control, customized television channel content and other current and future offerings, Connexion Technologies creates *A Better Connection*<sup>SM</sup> with its one-source technology solution. The company (formerly known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
