PRESS RELEASE

Connexion Technologies Continues to Lead Industry

Cary, North Carolina (March 6, 2007) – Connexion Technologies just won't stop growing. With a major acquisition last week, it added both employees and customers to the company. This transaction brought Connexion that much closer to reaching 100,000 designated units with its advanced telecommunications services.

Connexion Technologies is the country's premiere fiber-optic amenity company. According to *Broadband Properties*, a leading industry publication, "This quiet company may be second only to Verizon in Fiber to the Home (FTTH) deployment in the US." The company has exploded in the past year, signing additional contracts with national developers such as The Related Group and Ginn Resorts and Clubs. And to keep up with the number of developers seeking to partner with the company's fiber technology, Connexion has had to more than double its staff.

Fiber-optic technology allows the convergence of entertainment and communication services to be delivered at the speed of light. Connexion designs, installs and operates these fiber-optic networks using its own capital, not the developers. The final result is a faster, better connection.

With fiber optics, Connexion is pioneering the technology revolution. And as a pioneer, Connexion must explore uncovered territory. That's why it's not only acquiring new companies but also expanding into new markets nationwide. New York, Chicago, Houston, Dallas, Austin, Phoenix, Denver and Los Angeles are just a few of the newer areas where Connexion is established.

"There's a revolution occurring with fiber-optic technology and it's contagious. We can't just keep it in the southeast anymore," said Glen Lang, CEO of Connexion Technologies. "Buyers are starting to demand it. It's no longer a question of if, but when, fiber will be in most properties across the US."

And with that forecast, the future is looking bright for Connexion Technologies. This year, Connexion also foresees the likely acquisition of several more companies.

About Connexion Technologies

Connexion Technologies, the country's premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Its award-winning, blazing fast, Fiber to the Home (FTTH) and Fiber to the Unit/Premise (FTTU/P) networks have virtually unlimited bandwidth and are "future-ready" to handle emerging technologies. Connexion aligns its networks with leading service providers, who supply the best in television, voice, Internet, and

-cont-

security monitoring services. Connexion also offers properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), in-room and in-unit monitoring and management to remote energy control, customized television channel content and other current and future offerings, Connexion Technologies creates *A Better Connection*SM with its one-source technology solution. The company (formerly known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
