

NEWS RELEASE

CONNEXION TECHNOLOGIES AND GUEST-TEK PARTNER TO DEPLOY ONEVIEW TRIPLE PLAY IN RESORT MARKET

Partnership opens new fiber optic market opportunities

Calgary, Alberta, September 19, 2006 - Guest-Tek Interactive Entertainment Ltd., (“Guest-Tek”) (TSX: GTK), a leader in providing broadband technology solutions to the global hospitality industry, today announced it has completed a partnership agreement to provide its OneView triple-play system to Connexion Technologies. The partnership will see Connexion Technologies (www.cnxntech.com) and Guest-Tek (www.guest-tek.com) blaze a new path in the resort market.

Guest-Tek is the largest single global provider of hospitality broadband services with installations in over 3565 hotels and resorts (520,000 rooms) worldwide. Connexion Technologies is the industry leader in delivering Fiber to the Unit (FTTU) for resort and hospitality companies, such as Ginn Properties and WorldQuest. Connexion currently has 80 thousand units under contract, with a target of 200,000 by the end of next year.

The partnership will result in a new level of turn-key technology system being made available to resort developers and operators, with the following state-of-the art functionality:

- Quantum leap in guest technology infrastructure with NO investment to the developer
- Virtually unlimited bandwidth available for standard and premium video, telephone, HSIA, EOD/VOD and unit control applications
- Custom content insertions (program or channel) that can be used for resort benefit (for example property specific programming)
- All IP framework for simplicity and flexibility in service delivery and integration with PMS and hospitality management
- Buying power and capital model can be extended to electronics and other amenities

This package benefits the entire value chain in new developments:

- Developers face zero capital cost, benefit from door fees or recurring revenue, and see higher lot values and faster sell-through
- HOA/CA's get a lower cost service package in a single bundle with a solid network infrastructure capable of simple and efficient upgrades over time
- The residence owner sees better pricing and simplified billing for the full IP triple play, increased property value and easier ability to upgrade for future services

- cont. -

“Guest-Tek sees significant potential in the business model, strong market position and is confident in the experience Connexion has in this space,” said Arnon Levy, Guest-Tek President and CEO. “The growth potential in this new market is significant as more developments look for fiber connectivity and a full suite of flexible services.”

“Connexion is pleased to have added strength to our fiber infrastructure offering with the world’s leading IP triple play provider,” said Glen Lang, CEO “The size and scale of Guest-Tek’s customer base and their reputation and experience in the hospitality industry ensures our customers and end-users will receive a superior level of service and support.”

About Connexion Technologies

Connexion Technologies, the country’s premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Their award-winning, blazing fast, Fiber to the Home (FTTH) and Fiber to the Premise (FTTP) networks have virtually unlimited bandwidth and are “future-ready” to handle emerging technologies as they come to market. Connexion Technologies aligns with leading service providers, who supply their networks the best in television, voice, Internet, and security monitoring services. They also offer properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), unit monitoring and management, remote energy control, customized television channel content, to many more features and services, Connexion Technologies creates *A Better Connection*SM with their one-source technology solution. The company (formally known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
