Three More Properties Choose Connexion Technologies' Fiber-Optic Network

Cary, North Carolina (July 9, 2007) – Connexion Technologies will build powerful fiber-optic networks for three more properties: Livingston Ranch, a single-family community in the greater Yuma, AZ area (Kammann Development); Tuscany Villas at Painted Mountain, luxury town homes in Mesa, AZ (Mehan Construction); and The Plaza on Brickell, an upscale high-rise in Miami, FL (The Related Group).

The deployment of fiber-optic networks is rapidly increasing. According to an April study* by the FTTH Council and the Telecommunication Industry Association (TIA), these powerful networks have passed nearly eight million homes.

“Clearly, America’s need for speed is driving sustainable, accelerated growth in deployment of high bandwidth fiber to homes across the country,” said Joe Savage, President of the FTTH Council. “We expect this rate of growth will continue as an increasing number of Americans discover the ease with which [applications] are delivered through fiber-enabled connections.”

As the premier fiber-optic amenity company in the nation, Connexion Technologies has exploded in the past year, signing additional contracts with national developers at a steady rate. Connexion Technologies continues to help the southeast, particularly Florida, lead the nation in Fiber to the Home (FTTH) deployment.

“With many states following Florida’s lead, we now find ourselves out West,” said Jaime Cnossen, National Field Marketing Manager for Connexion Technologies. “Our partnership with Tuscany Villas at Painted Mountain is the first Certified Fiber-Optic Development in the state of Arizona.”

About Connexion Technologies

Connexion Technologies, the country’s premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Its award-winning, blazingly fast, Fiber to the Home (FTTH) and Fiber to the Unit/Premise (FTTU/P) networks have virtually unlimited bandwidth and are “future-ready” to handle emerging technologies. Connexion aligns its networks with leading service providers, who supply the best in television, voice, Internet, and security monitoring services. Connexion also offers properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), in-room and in-unit monitoring and management to remote energy control, customized television channel content and other current and future offerings, Connexion Technologies creates *A Better Connection*SM with its one-source technology solution. The company (formerly known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
