PRESS RELEASE

Connexion Roles Out Three Additional Partnerships in Florida

Cary, North Carolina (April 9, 2007) – Three new developments have partnered with Connexion Technologies to enjoy the benefits of fiber-optic technology: Sayan, a high-rise that overlooks the Atlantic in Sunny Isles Beach, FL (J. Milton and Associates); Sonesta Orlando Resort at Tierra del Sol, a Mediterranean-inspired community in Central Florida (American Leisure Real Estate Group and Resort Development Group); and The Loft Downtown II, a high rise with almost 500 lofts in Miami, FL (The Related Group).

“Florida continues to take advantage of the fiber-optic revolution,” said Glen Lang, CEO of Connexion Technologies. “As fiber becomes more and more established in Florida, we’re seeing that other states are starting to follow in its footsteps.”

Fiber-optic technology allows the convergence of entertainment and communication services to be delivered at the speed of light. The final result is a faster, better connection. Because Connexion designs, installs and operates these fiber-optic networks using its own capital, not the developers, it’s a win-win situation for everybody.

“At the Related Group, we strive to provide our customers with a state-of-the-art product which requires cutting edge technology,” said Eric Fordin, Project Director of the Related Group. “Connexion Technologies provides our projects with the proper infrastructure and our buyers with the end, user experience that is expected among our luxury amenities.”

With the rollout of today’s advanced applications, demand for bandwidth has skyrocketed. Traditional copper wiring simply cannot keep up with consumer needs anymore. That’s where Connexion Technologies comes into play because its fiber-optic amenity can handle emerging technologies as they come to market.

“There’s a revolution occurring with fiber-optic technology and it’s contagious. We can’t just keep it in the southeast anymore,” said Lang. “Buyers are starting to demand it. It’s no longer a question of if, but when, fiber will be in most properties across the US.”

And with that forecast, the future is looking bright for Connexion Technologies and the fiber industry. Other states are starting to follow in Florida’s footsteps.

About Connexion Technologies

Connexion Technologies, the country’s premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Its award-winning, blazing fast, Fiber to the Home (FTTH) and Fiber to the Unit/Premise (FTTU/P) networks have virtually unlimited bandwidth and are “future-ready” to handle emerging technologies. Connexion aligns its networks with leading service providers, who supply the best in television, voice, Internet, and security monitoring services. Connexion also offers properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), in-room and in-unit monitoring and management to remote energy control, customized television channel content and other current and future offerings, Connexion Technologies creates *A Better Connection*SM with its one-source technology solution. The company (formerly known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
