FOR IMMEDIATE RELEASE

Connexion Technologies Continues to Cover Territory

Cary, North Carolina (September 20, 2007) – Connexion Technologies has announced that it will build powerful fiber-optic networks in five new properties: Park Lafayette, a high-rise in Milwaukee, WI (Renaissant Development Group, LLC); Verdae Development, a mixed-use community in Greenville, SC (Verdae Development); The 500 Brickell, luxury condos in Miami, FL (The Related Group); and two in Walls, MS: Fountainbrook, a single-family subdivision (J Sweeney Homes and Sweeney-Bronze Holdings, LLC) and The Leatherman Master-Planned Community, a mixed-use development (Leatherman Family).

As technology becomes engrained into daily life, homebuyers have started considering telecommunications services as an important factor when making their purchasing decisions.

“Technology has changed the way we think about our homes,” said Glen Lang, CEO of Connexion Technologies. “No longer do homes simply sustain us. They connect us to the outside world and enhance our lifestyles and that requires state-of-the-art technology.”

Because fiber-optic technology can deliver services at the speed of light and has virtually unlimited bandwidth, developers are starting to put it in their communities. Connexion Technologies will fund the deployment of fiber-optic networks throughout these four new properties. It will serve as a “one-stop” shop by not only designing and installing the network but also by operating and maintaining it.

“The technology developers can provide for their residents is only as good as the company that maintains it,” said Carter Steg, EVP, Connexion Technologies. “Although many hours are spent designing and engineering the networks, what will make or break residents’ experience is the operator’s ability to provide easy-to-use, reliable service, 24/7.”

About Connexion Technologies

Connexion Technologies, the country’s premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Its award-winning, blazing fast, Fiber to the Home (FTTH) and Fiber to the Unit/Premise (FTTU/P) networks have virtually unlimited bandwidth and are “future-ready” to handle emerging technologies. Connexion aligns its networks with leading service providers, who supply the best in television, voice, Internet, and security monitoring services. Connexion also offers properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), in-room and in-unit monitoring and management to remote energy control, customized television channel content and other current and future offerings, Connexion Technologies creates *A Better Connection*SM with its one-source technology solution. The company (formerly known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
