PRESS RELEASE

Connexion Technologies to Exhibit at ARDA

Cary, NC (March 14, 2007) –ARDA (American Resort Development Association) is known as the “voice of the resort industry.” Some of the biggest names in the hospitality sector will be attending its 2007 Convention and Exposition in Orlando, March 25-29. Ginn Resorts is one of those big names and this year, its technology partner, Connexion Technologies, will be attending, as well.

“We’re really excited to attend ARDA for the first time,” said Glen Lang, founder and CEO of Connexion Technologies, the country’s premiere fiber-optic amenity company. “We’re trying to get the word out that fiber-optic technology is a perfect fit for the resort and hospitality industry.”

Today, expectations in the hospitality marketplace are on the rise. Because technology has become more commonplace in day-to-day living, guests now expect to find the same comforts in their suites that they would in their homes. That means premium technology and entertainment in resorts.

Fiber-optic technology allows the convergence of entertainment and communication services to be delivered at the speed of light. The final result is a faster, better connection. Because Connexion designs, installs and operates these fiber-optic networks using its own capital, it’s a win-win situation for developers.

And in an industry that demands convenience, simplicity and reliability, Connexion fits right in. It’s a one-source technology solution, offering premium packages that guarantee great services and the best in-room products available on the market. That’s why it’s a perfect partner for resorts.

“It’s an honor to invest in the hospitality industry because the standard of excellence is so high,” Lang said. “Attending ARDA is our way of showing the country that we take this industry very seriously.”

At the convention, Connexion will be showcasing and explaining how fiber-optic technology can differentiate resorts and bring them tomorrow’s technology today.

About Connexion Technologies

Connexion Technologies, the country’s premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Its award-winning, blazing fast, Fiber to the Home (FTTH) and Fiber to the Unit/Premise (FTTU/P) networks have virtually unlimited bandwidth and are “future-ready” to handle emerging technologies. Connexion aligns its

-cont-

networks with leading service providers, who supply the best in television, voice, Internet, and security monitoring services. Connexion also offers properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), in-room and in-unit monitoring and management to remote energy control, customized television channel content and other current and future offerings, Connexion Technologies creates *A Better Connection*SM with its one-source technology solution. The company (formerly known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
