## **PRESS RELEASE**

### **Connexion Technologies Partners with Three Major Developments**

Cary, North Carolina (February 15, 2007) – Connexion Technologies has announced that it will build powerful fiber-optic networks for three new properties: Vistas On the James, a waterfront condominium development in Richmond, VA (Dominion partners); Mosaic on Hermann Park, luxury high-rise condominiums in Houston, TX (Phillips Development and Wood Partners); and Carothers Crossing, a traditional neighborhood development in Nashville, TN (Wood Ridge Development).

Fiber-optic networks serve as platforms to deliver telephone, television, high-speed Internet and other services. By providing fiber-optic wiring directly to each unit, Connexion delivers more bandwidth than traditional coaxial cable. The virtually unlimited capacity of fiber allows boundless data to travel at the speed of light. In addition, residents can receive wireless Internet access in multiple common areas of their buildings.

“A single piece of fiber can handle all telephone, Internet, television and security needs,” said Glen Lang, chief executive officer of Connexion Technologies. “Fiber-optic wiring is more reliable and faster than traditional wiring – and it has enough bandwidth to accommodate the growth of future technology.”

The creation of fiber-optic networks is rapidly increasing. According to a study by the Fiber to the Home (FTTH) Council and the Telecommunication Industry Association (TIA), deployments of these powerful networks have passed well over six million homes. Every month, they pass an estimated 300,000 more homes. FTTH Council President Joe Savage said he thinks it’s no longer a question of if, but when, to build them.

Connexion designs, installs and operates the optical networks using its own capital, not the developers. For resident convenience, the community dues include the cost of the telecommunications services by bundling them into a single amenities package. This allows residents to receive tomorrow’s technology today.

#### **About Connexion Technologies**

Connexion Technologies, the country’s premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Its award-winning, blazing fast, Fiber to the Home (FTTH) and Fiber to the Unit/Premise (FTTU/P) networks have virtually unlimited bandwidth and are “future-ready” to handle emerging technologies. Connexion aligns its networks with leading service providers, who supply the best in television, voice, Internet, and

-cont-

security monitoring services. Connexion also offers properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), in-room and in-unit monitoring and management to remote energy control, customized television channel content and other current and future offerings, Connexion Technologies creates *A Better Connection*<sup>SM</sup> with its one-source technology solution. The company (formerly known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
