**PRESS RELEASE**

**Connexion Continues to Grow...Will “Light” 3 More Developments**

Cary, North Carolina (April 3, 2007) – Connexion Technologies has announced that it will build powerful fiber-optic networks for three new properties: Highlands at Walnut Creek, a mountain community in Western NC (Highlands Mountain Properties); The Park Condos, an upscale mid-rise residential project in Charlotte, NC (Verna and Associates); and The Point Orlando Resort, a Mediterranean-style high rise in Orlando, FL (Seymour International).

As the premier fiber-optic amenity company, Connexion has exploded in the past year, signing additional contracts with national developers at a steady rate. According to *Broadband Properties*, a leading industry publication, “This quiet company may be second only to Verizon in Fiber to the Home (FTTH) deployment in the US.” And these new additions in March are evidence of Connexion’s continual growth.

“We take care of our customers. We’re there every step of the way,” said Glen Lang, CEO of Connexion Technologies. “We design, install, operate and then maintain the fiber-optic networks using our own capital, not the developers. It’s a win-win situation for everybody.”

“But much of our growth should be credited to the actual technology,” Lang said. “It’s almost too good to be true.”

Fiber-optic technology allows the convergence of entertainment and communications services to be delivered at the speed of light. In addition, fiber’s unlimited bandwidth can accommodate emerging technologies as they come to market. In other words, this state-of-the-art technology platform is future proof.

“The secret is out. Fiber optics is the most efficient and effective way to deliver technology,” Lang said. “Buyers are starting to demand it. Every new property that we connect with fiber brings us one step closer to fulfilling that demand.”

**About Connexion Technologies**

Connexion Technologies, the country’s premier fiber-optic amenity company, builds and operates state-of-the-art entertainment and communication networks in single family, multi family, high rise, resort and hospitality properties from coast to coast. Its award-winning, blazing fast, Fiber to the Home (FTTH) and Fiber to the Unit/Premise (FTTU/P) networks have virtually unlimited bandwidth and are “future-ready” to handle emerging technologies. Connexion aligns its networks with leading service providers, who supply the best in television, voice, Internet, and security monitoring services. Connexion also offers properties a suite of comprehensive entertainment and communication technology solutions. From Video-on-Demand (VoD), in-room and in-unit monitoring and management to remote energy control, customized television channel content and other current and future offerings, Connexion Technologies creates *A Better Connection*<sup>SM</sup> with its one-source technology solution. The company (formerly known as Capitol Infrastructure), based in Cary, North Carolina, was established in 2002 and has various office locations around the country.
